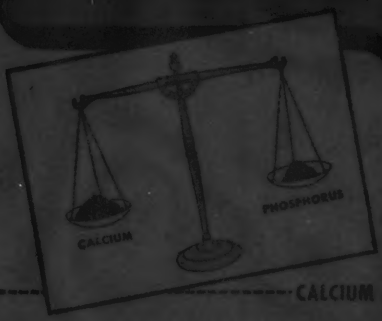
Actual tests show Pard supplies optimum Calcium and Phosphorus in proper balance



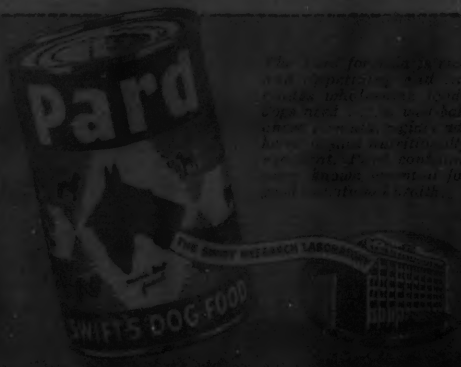
The ratio of Calcium to Phosphorus appears to be more important than the actual amounts present. The scale illustrates the nutritional balance achieved thru proper ratio of Calcium to Phosphorus in Pard dog food.

CALCIUM AND PHOSPHORUS CONTENT OF PARD

Based on requirements for rapid growth of pups, and for the female during gestation and lactation.

CALCIUM—Essential, in combination with phosphorus in proper ratio, and with vitamin D, for normal bone and tooth structure. Also important in certain functions of heart, nerve and muscle tissue.

PHOSPHORUS—Vital, in combination with Calcium in proper ratio, and with vitamin D, for normal bone and tooth structure. Necessary for activation of certain enzymes. Important in metabolism of carbohydrates and fats and normal activity of the muscles.



Vol. 65, No. 9 September 1948

The AMERICAN KENNEL CLUB STUD BOOK REGISTER
